MISSION STATEMENT

Precise Welding Services (PWS), LLC is a locally minority owned and rapidly-growing company with over 80 years combined experience. We operate as a Commercial and Industrial contractor specializing in piping and structural steel. Our piping experience includes but is not limited to: steam, oil, sanitary, stainless, carbon, chrome moly, threaded, welded, glued, soldered and grooved; with multiple NDE testing options as requested by the client.

We are also proficient in Demolition, Equipment Installation, Equipment Relocation, Maintenance, Millwright, Rigging and Fabrication in shop or mobile service. PWS is on call 24 hours a day, 7 days a week. Our focus is to perform the highest quality work in the safest manner possible. Our Safety coordinator is a highly trained Paramedic/EMT with current certification as OSHA 30, 510 and 500 MESH and extensive background within the safety industry. All employees are drug tested during the application process and are subject to random drug testing at any time during their employment with PWS.

Here at PWS our mission is to satisfy our customers and build lasting relationships by providing safe, reliable, quality craftsmanship, with impeccable integrity and attention to detail. Our goal is to provide our customers with superior welding, fabrication and maintenance services that exceed our customers expectations while maintaining the safety of personnel and plant equipment, at competitive prices, and in a timely manner.

Safety

Safety is an integral part of our company. We strive for excellence in everything we do and expect no less in our safety department. Our employees are trained on safety recognition, preventative action, and proper safety procedures. All safety procedures are documented and available upon request.

- New Hire Acknowledgement
- OSHA Certified training program
- Daily Safety Briefs
- Pre-job Briefs
- “Wait One” Safety program
- Morning Overview on site
- Weekly Safety review

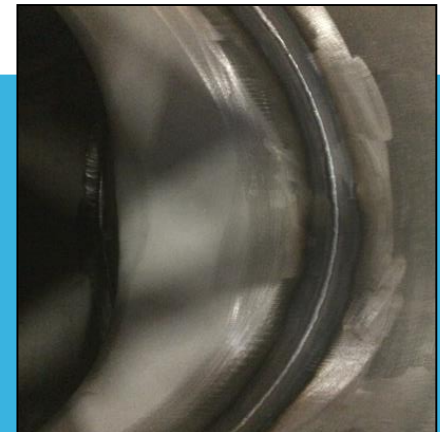

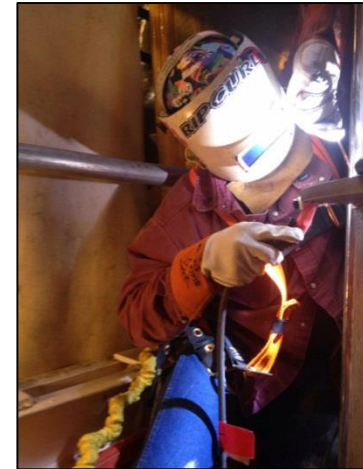

Safety starts with me!

WELDING

At PWS, welding is our specialty, We offer manual and orbital welding services depending on the customer's needs and specifications. Our welding department is staffed with certified welders IAW AWS D1.1 and ASME Section IX, tested in house. We are always searching for new and innovative ways to improve safety, quality, and productivity while maintaining our quality and attention to detail. Below is a list of welding and services we offer:

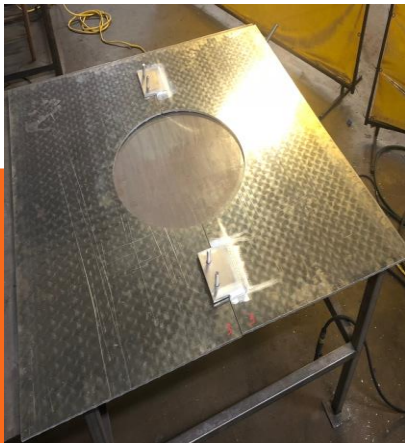

- PE Certified Engineering Drawings (available upon request)
- Certified fabrication drawings (available upon request)
- Tube & Pipe Welding: GTAW, SMAW, GMAW
- Structural Steel Fabrication
- Thermal Cutting: Oxy/Fuel, Plasma
- Mock up, Training and Certification Facility
- Weld Overlays (available upon request)
- Post Weld Heat Treat & Stress Relief (available upon request)
- CNC Plasma cutting (available upon request)

FABRICATION

PWS employs welders and fabricators with superior skills and years of experience in specialty metal fabrication and repair. Bring us your welding and steel fabrication needs or let us come to you. Our in house fabrication shop can handle all projects including but not limited too: pipe fabrication, access stairs, catwalks, mezzanines, tanks and support structures. We offer 24/7 mobile or in house fabrication, welding and repair services.

Our fabrication shop is staffed with well trained highly motivated welders.

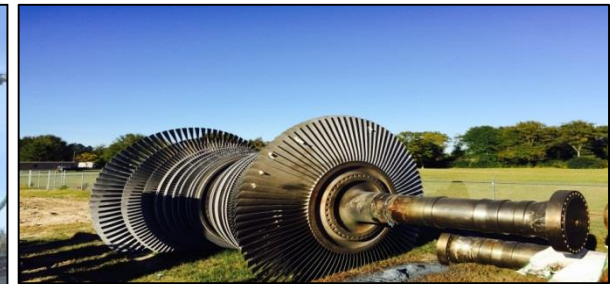

DEMOLITION

PWS is experienced in removing, relocating and demolition of equipment with Operators and Riggers who are highly trained and motivated to succeed. We use a state of the art cutting system (OxyLance) to demo large piece of equipment and remove it from your site.

Demolition of LP Turbine system for Robinson
Nuclear Plant

Burning Bars will cut virtually any material that will oxidize. The 7500° F tip is 2000° F hotter than an oxy/fuel torch.

ADDITIONAL SUPPORT

PWS is also experienced outside of the welding / fabrication business with team members covering many roles over the past 15 years in the Nuclear industry providing the following services.

- PE Certified Engineering Drawings**
 - Project Logistics**
 - Field Engineering**
 - Vendor / Project Oversight**
 - Implementation Manager**
 - Project Coordinator**
 - Work Package Planning**
 - Strategic Project Planning**
 - Project Executing**
- 

Conclusion
